

In the space to the right, sketch out the page layout you will use for your website. Your page structure sketch should illustrate the size and position of the following required container elements:

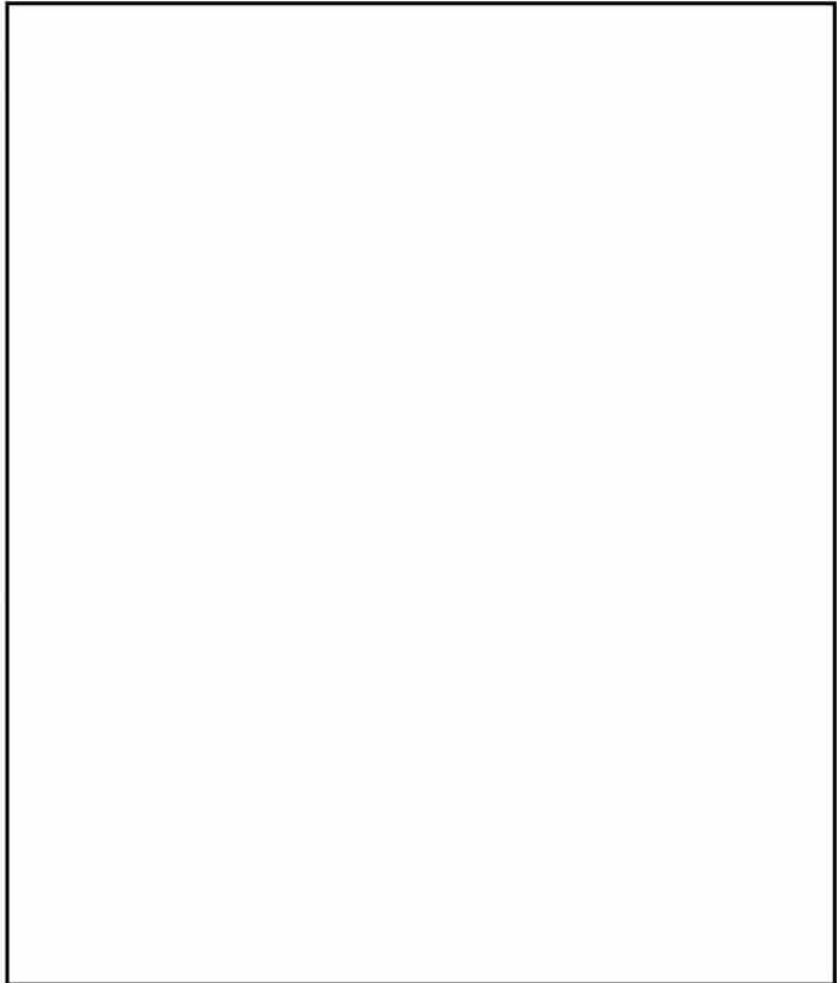

- header
- nav
- article
- footer

The section and article elements may be used more than once if necessary. It is important that your design reflect a balanced page design layout.

Optional container elements you may choose to also include:

- aside
- section
- div

Site Color Scheme:
