

Identifying Problems That Affected Mexico

Task: Charting problems and the people affected by them

Purpose: To understand main ideas and conflicts in history

Instructions Identifying problems in history means determining the difficulties faced by a group of people at a certain time.

Pairs of students will work together to identify one problem from each of the parts in this section. Students should name people who were affected by the problem or tried to solve it.

While there may be several problems mentioned, students should find and focus on main ideas.

In a shared Google Doc (share with partner and rweaver@natomasunified.org) Use headlines, images, and captions as guides to finding main ideas. Record their answers in a chart like this one.

Title of Part	Problem	People Involved
Santa Anna and the Mexican war		
Juarez and La Reforma		
Etc.		
Etc.
