

World War 1 in Pictures

Your task is to create a narrative history of World War 1 using presentation software and pictures. Your slideshow will have a minimum of 10 slides only (no title, put all citations in the notes). You must have a complete narrative of the war. Each picture must have a box that describes the aspect of WW1 that the picture represents (see example below). Your grade will be based on 1) the technical layout of each picture and its description box, 2) all pictures' relation to the war as a whole, and 3) the selection of pictures that accurately describe the circumstance of the war they are representing (like the sample below)

Western Front

Trench warfare was bloody and unproductive. Many were killed for little ground.

The use of machine guns made killing easy. Gas was often used by both sides.
